PROFESSIONAL EXPERIENCE

Halifax Health Medical Center

36 Bed Trauma-Surgical Intensive Care Unit | Staff Registered Nurse

Daytona Beach, FL

August 2021- present

- Provides comprehensive care to critically ill trauma and surgical patients requiring advanced ventilator support, tracheostomies, arterial lines, central venous lines, and chest tubes in a high-acuity Level II ICU.
- Manages and titrates continuous intravenous infusions, including vasoactive agents, sedatives, and antihypertensives, to optimize hemodynamic stability, patient comfort, and pain control.
- Monitor and manage patients requiring continuous renal replacement therapy and advanced neuromonitoring, including external ventricular drains (EVDs) and lumbar drains, with continuous assessment of intracranial pressure, cerebrospinal fluid drainage, and neurologic status.
- Frequently precepts newly hired nurses, providing clinical mentorship and feedback in the management of critically ill trauma and surgical patients.

RESEARCH EXPERIENCE

Undergraduate Honors Thesis

Complementary and Alternative Medicine (CAM) for Individuals with Epilepsy

University of Central Florida | 2021

- Completed an undergraduate honors thesis utilizing a literature review methodology to evaluate current evidence surrounding complementary and alternative medicine (CAM) among individuals with epilepsy.
- Evaluated literature related to CAM therapies, including the ketogenic diet, neurostimulation, physical activity, medical cannabis, and cannabidiol (CBD).
- Collaborated with faculty members to identify, organize, and synthesize research findings in support of project objectives.
